## LOWENTRY

The Low Entry bus is a modern City & Suburb bus, fitting a short drive as well as a trip to the suburbs. The bus is designed for convenient boarding & disembarking & swift passenger through-flow. Both front & back of the Low Entry bus are decorated in an original & unique manner giving a feeling of comfort & ease.

The bus features two floor levels - a lower level between the front & middle doors followed by an elevated level to the end of the bus. The lower level is designed for seated & standing passengers while the higher level is designed with seated travellers in mind.

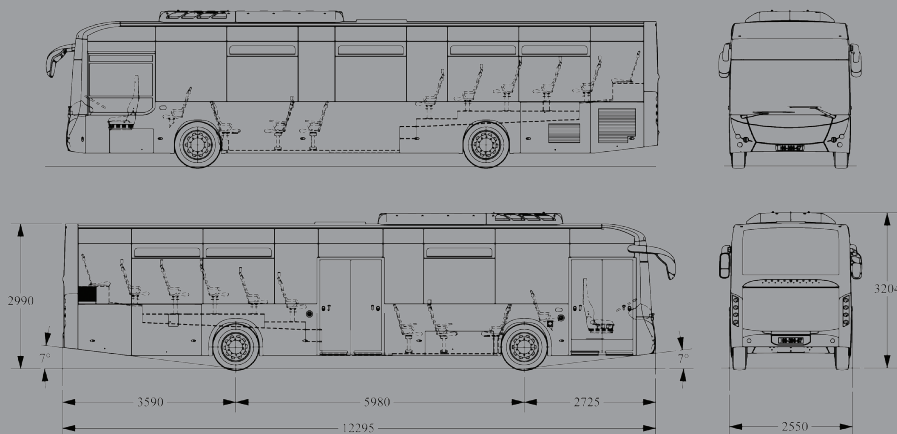

This 12.3 meters long bus, comfortably travels with 38 seated & 52 standing passengers, while giving it its all with 290 HP, always keeping comfort in mind for our passengers both in their chairs or holding the safe grips which allow for driving enjoyment for all passengers alike.

Keeping up with the times, the Low Entry bus has a passenger information system in real time & an ergonomic driver environment & expanded field of view contribute to driving safety.
