## SAAR 31

Saar 31 was created with luxury in mind.

This luxury tourist coach, developed by Haargaz Transportation, is a product of unique & skilled engineering efforts & known vehicle designer Dori Regev. The development procedure assimilated all experience & knowledge gained through & accumulated during prior & recent tourism bus projects, assisted in creating a bus that caters to travellers that have pleasure & leisure in mind.

Saar 31 has a modular bus body structure, capable to fit different chassis & has been manufactured on top of Mercedes & Man chassis. With its modern look & feel the bus gives passengers a comfortable pleasant ride heading to their next attraction. Unique attention had been set to achieve high human engineering & uncompromised care for passenger's safety

The bus is defined by its rich accessories & excellent luxurious finishing such as personal night lights & air-condition vent, luxurious luggage racks, large wide & spacious inner space, comfortable & lavish seats with reclining backs (an option, not on all busses), & guiding light source in aisles.

Since the Saar 31 is a tourist bus we wanted to ensure that the tourist will be able to see as much as possible of the outside, the curved shaped big side windows which have sliding or roller blinds, if needed, give that effect.

## Saar 31

For the very important driver, Haargaz created a work station that provides accessibility, comfort & full control of all the bus's systems with a 7" LCF screen connected to the rear & inner view cameras, GPS, bottle cooler to quench their thirst, & front dome with A/C outlets & personal lighting source for the driver & tour guide.

The bus itself has a designed GRP entrance stairway which leads to a floor leveled service opening. In case of emergency, the bus has an electrical remote controlled emergency roof hatch to accompany its wide opening passenger doors.

The Saar 31 is a tourist coach made for luxury & comfort.
